

F14 Products and Solutions for End of Year Cleaning and Changeover

As we get to the end of the year, most machine shops use this time to clean and empty their machines ready for the new year. This is a perfect time to trial a new coolant!

Our most popular products are

Stabillo Cut 005

Biostatic, skin friendly, neutral smell, mineral-oil based coolant.

Suitable for Cast Iron and also Steel, High Alloy Metal and Aluminium Alloys.

Stabillo Cut Extreme

Biostatic, skin friendly, semi-synthetic, microemulsion coolant.

Suitable for Cast Iron and also Steel, High Alloy Metal, Aluminium Alloys, Titanium and Non-Ferrous Metal.

Stabillo Cut ALB SW

Biostatic, skin friendly, low foaming, microemulsion coolant.

Suitable for Steel, High Alloy Metal and Aluminium Alloy and also Cast Iron, Titanium, Non-Ferrous Metal and Hastelloy/ Duplex/ Super Duplex.

MicroSol 585XT

Aerospace approved, high-lubricity, semi-synthetic, microemulsion coolant.

Suitable for Steel, High Alloy Metal and Aluminium Alloy and also Cast Iron, Titanium, Non-Ferrous Metal and Hastelloy/ Duplex/ Super Duplex.

This is not an exhaustive list. We supply a full range of coolants, lubricants, greases, oils and accessories such as tramp oil skimmers and easy-to-install mist extraction units.

If you are interested to trial a new coolant, please contact us on +61 8 8363 1311.

OTHER COMPLIMENTARY MACHINES, WEAR ITEMS AND CONSUMABLES

Bandsaw Blades, a range of bandsaw blades for different applications and machines that are cut and welded to your required length.

Bevelling/ Chamfering, a range of high-quality machines, consumables and wear items for all types of bevelling/ chamfering including plate, structural and pipe.

Mist Extraction, high efficiency and minimal upkeep units that can be installed directly on your machine or next to it. It works using electrostatic precipitation which allows for minimal moving parts, low upkeep and excellent reliability.

Oil Skimmers, a range of oil/ tramp oil skimmers from simple belt driven machines to suction machines designed for larger workshops.

Articulated Steel Tubes, for the supply of coolant at low, medium or high-pressure. Also useful for air blasting operations. Ideal for both fixed-head and Swiss-type CNC lathes, vertical and horizontal machining centers, grinding or transfer machines.

Clear Protective Screen, is intended for use in machine tools for machining with water-oil based cooling lubricants. They are attached to the inside of the machine protective screen of the machine tool as a supplement.
