

Slitter Tooling

ProTube supplies a range of high quality slitter tooling and shear blades for many applications.

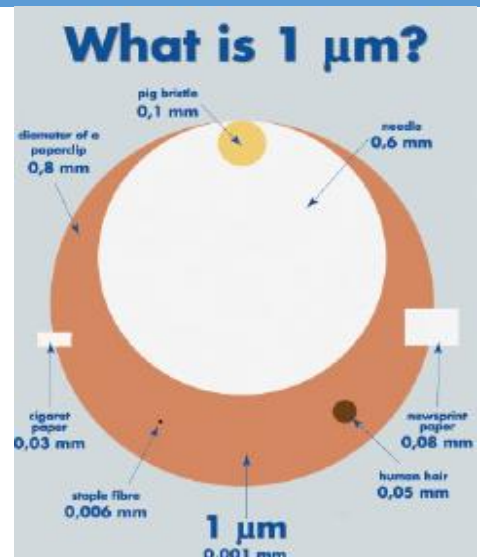

Outstanding Quality

Our blades are manufactured in Europe to the highest quality standards to ensure optimum performance.

Standard Tolerances:

- Thickness tolerance of $\pm 1\mu\text{m}$
- Surface finishes of Ra 0.1 μm

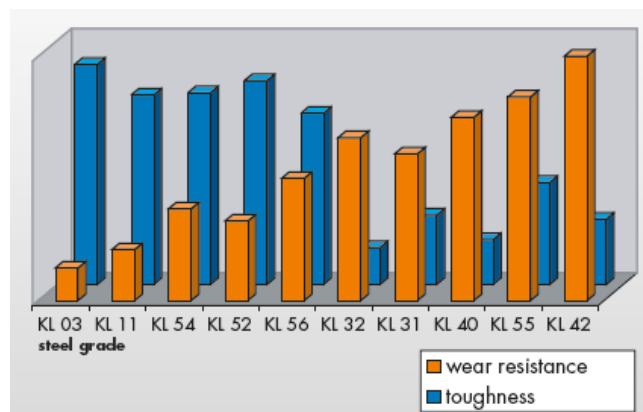

Blades below 420mm in diameter can be manufactured to even tighter tolerances if required.

Tool Steels

Slitter, Scrap Chopper Blades and Shear Blades

Performance is optimised by selecting the most suitable combination of wear resistance and toughness for a particular application. Knives and blades are available in a variety of steel grades to achieve this.

Products

- Rotary Slitter Knives
- Tube Cut-off Knives
- Custom Length Knives
- Scrap Chopper Blades
- Shear Blades
- Profile Shear Blades
- Steel Stripper Rings
- Spacers
- Separator Discs
- Guide Ways
- Knife Holders

Strapping

High quality steel strapping is available in a variety of grades, widths and surface finishes.

ARES Strap

- Standard strapping for most applications
- 750-800N/mm² tensile strength
- 8% minimum elongation before breakage

ARES PLUS

- High strength strapping
- 950 N/mm² tensile strength
- 12% minimum elongation before breakage

Black Painted and Waxed Finish

- Coated with black paint and waxed after drying
- Better corrosion protection than unpainted waxed strap

Zinc Painted and Waxed Finish

- Coated with zinc based paint and waxed after drying
- Highest corrosion resistance

PET strap is also available. Similar to the steel strapping, this is available in a variety of dimensions.

PET Strapping

- 336 kg minimum breaking load
- 8% minimum elongation before breakage (based on 12x0.7mm smooth strap)
